Professional Experience

1) Company Name : Zeal-Encore Technologies, Bangalore

- Position : Software Engineer
- Period : July 2015 - Oct 2017

2) Company Name : Infosys Technologies Limited

- Position : Technology Analyst
- Period : Oct 2017 - Till Date

3) Company Name : HCL Technologies(Client Societe Generale)

- Position : Senior Software Developer
- Period : Oct 2019 - Till Date

Project Details

HCL Technologies(Societe Generale), Bangalore

Oct 2019 – Till date

Role: Senior Software Developer

Project Name: ALD Automotive

Technologies used: C#.Net, ReactJs, ASP.NET MVC, LINQ, entity framework SQL Server 2012, Windows Services, WCF, jQuery and JavaScript's, telerik controls.

Description:

ALD Automotive is the leader in vehicle leasing operations in Europe and manages over 1,63 million vehicles across 43 countries worldwide. ALD Automotive provides customers with total fleet management flexibility – from pure financing of cars to comprehensive outsourcing operations. ALD net helps you to manage fleet 24 hours a day, 7 days a week, providing tailored alerts on mileage deviation, renewals, fuel consumption, etc. Advanced drill down capabilities focus on the international fleet to a single local contract with specific country or entity views. Ready-to-use reports are available in 14 languages covering all key areas including new orders and deliveries, terminated contracts, fleet running costs etc. All reports can be customized through advanced capabilities such as online sorting and filtering, currency and distance conversion, and exporting into different formats. My ALD is designed to make fleet management and administrative tasks easier, faster and more efficient. It means you and your drivers have more time to focus on core activities too.

Roles and responsibilities:

- Designed and developed the application using C#, MVC, LINQ, entity framework, SQL Server 2012.
- Extensively implemented design patterns and best practices.
- Developed the User Specification Document from the present understanding of the tool.
- Creating database and database objects..
- Extensively implemented design patterns and best practices.
- Deployment (IIS) and Maintained code migrations from development, test and production environments.
- Automated deployment using Octopus and Source code maintained using git.

Infosys Limited, Bangalore

Oct 2017 – Oct 2019
